

Marcellus Geraldio Florenta

Bogor, Indonesia • geraldio.florenta@gmail.com • +6289652337901 • [LinkedIn](#) • [Github](#)

Computer Science student specializing in Machine Learning and Computer Vision with hands-on experience building and deploying AI-powered applications using TensorFlow, Streamlit, and Hugging Face. Experienced in NLP, transfer learning, and end-to-end ML workflows including preprocessing, model training, evaluation, and deployment.

Education

BINUS University Bandung

Bachelor of Computer Science.

Bandung, Indonesia

Expected 2027

Relevant Coursework or Thesis: Software Engineering, Artificial Intelligence, Computer Vision in IoT, IoT Development & Architecture, OOP.

Projects

Animal Image Classification System | Computer Vision

May 2026

Python, TensorFlow, OpenCV, Streamlit, Hugging Face

- Built and deployed a computer vision system to classify 10 animal species using 22,000+ images
- Implemented Transfer Learning with MobileNetV2 and achieved **94% test accuracy**
- Developed a real-time inference web application using Streamlit
- Deployed the production-ready model on [Hugging Face Spaces](#)

Sentiment Analysis of Roblox Reviews | NLP & Deep Learning

April 2026

Python, TensorFlow, Scikit-learn, Pandas, Sastrawi

- Scraped and analyzed 10,000 Roblox reviews from Google Play Store
- Applied NLP preprocessing including slang normalization, stemming, and stopword removal
- Trained and compared 5 ML/DL architectures including CNN+LSTM, BiLSTM, and SVM+TF-IDF
- Built a sentiment classification system capable of categorizing reviews into three sentiment classes.
- Deployed the application on [Hugging Face](#) for public inference access

Leadership & Activities

HIMTI BINUS Bandung

Bandung, Indonesia

Activities - Publication and Marketing Division

March 2025 – Present

- Manage and schedule digital publication content for HIMTI social media platforms
- Research and write technology-related articles for official HIMTI publications
- Contribute to branding and engagement strategies to improve organization visibility

Coding Camp powered by DBS Foundation

Bogor, Indonesia

AI Engineer Cohort | Remote

Feb. 2026 – Present

- Selected participant in the DBS Foundation x Dicoding AI Engineer Coding Camp program
- Develop and deploy practical AI applications using TensorFlow, Python, and Streamlit
- Strengthen skills in Machine Learning, NLP, Computer Vision, and AI deployment workflows
- Work collaboratively with multidisciplinary cohorts including Full-stack, Data Science, and AI Engineering

Technical Skills

Programming: Python, C++, JavaScript, SQL, HTML/CSS, C

AI/ML: TensorFlow, Scikit-learn, Pandas, OpenCV, NLP, Transfer Learning

Deployment & Tools: Flask, Streamlit, Hugging Face, Git, VS Code, Google Colab

Courses - Certificates:

- **Dicoding:** Deep Learning, Machine Learning, Data Visualization, Basic AI
- **Kaggle:** Machine Learning
- **EF SET:** English Certificate 61/100 (C1 Advanced)
